Bills introduced in the Bengal Legislative Council, Reports of Select Committees presented or to be presented in that Council, and Bills published before introduction in that Council.

GOVERNMENT OF BENGAL.

BENGAL LEGISLATIVE COUNCIL.

NOTIFICATION.

No. 1058L., dated Calcutta, the 6th August, 1918.—His Excellency the Governor having been pleased to order, under rule 31(*1*) of the Bengal Legislative Rules, 1912, the publication of the following Bill, together with the Statement of Objects and Reasons which accompanies it, in the *Calcutta Gazette*, the Bill and the Statement of Objects and Reasons are accordingly hereby published for general information. It is proposed to introduce and consider and to pass the Bill at the meeting of the Bengal Legislative Council to be held on the 19th instant :—

THE CHITTAGONG PORT (AMENDMENT) BILL, 1918.

A

BILL

to amend the Chittagong Port Act, 1911. Ben. Act V of 1911.

WHEREAS it is expedient to amend the Chittagong Port Act, 1911, in the manner hereinafter appearing:

It is hereby enacted as follows:—

Short title. **1.** This Act may be called the Chittagong Port (Amendment) Act, 1918.

Amendment of section 58 of Bengal Act V of 1911. **2.** In section 58 of the Chittagong Port Act, 1911,— Ben. Act V of 1911.

(*1*) sub-section (2), and

(*2*) in sub-section (3), the words, figure and brackets "Subject to the limits enacted by sub-section (2)",

shall be omitted.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to improve the financial position of the Port of Chittagong, which is very unsatisfactory. Under section 58 of the Chittagong Port Act, 1914 (Ben. Act V of 1914) the river due imposed on goods landed from, and shipped into, sea-going vessels is limited to the statutory maximum of four annas per ton. There is no such maximum limit in the Port of Calcutta—*see* section 108 of the Calcutta Port Act, 1890 (Ben. Act III of 1890). The intention of the Bill is to remove this limitation, thus enabling the Commissioners of the Port of Chittagong to assimilate, so far as possible, the schedules of their charges to those in force in the Port of Calcutta.

3. The Hospital attached to the Sanitarium was opened on the 15th March and closed on the 15th November 1917. It was occupied for eight months and two days during that year.

4. The following table shows the number of each class of patients and their relatives admitted into the Sanitarium and Hospital during the past six years:—

6. The number of patients treated in hospital in the year 1917 was 136 against 172 in the year 1916. The hospital attached to the Sanitarium was occupied by patients for eight months and two days in the year under report. against eight months and twenty-seven days during the year 1916.

8. The average stay of each resident was 19 days as compared with 17 days in the year 1916.

9. As usual, the greater number of people came from Calcutta, while those from this district came next. It is interesting to note that people from very long distances, such as Allahabad, Assam, Behar, Bombay, Jabbalpore, Mooltan, Nagpore, Orissa, Ranchi, Rawalpindi and Silchar, were attracted here for change and treatment.

The Committee thankfully accepted the offer and decided to invest the amount in 5½ per cent. War Loan and also directed that the request of the donors may be carried out.

(*iii*) There were 6 cases of Malarial fever in 1917 against 16 in 1916. The patients were cured.

(*iv*) There were 4 cases of Pneumonia in 1917 against 3 in 1916. The patients were all cured.

(*vii*) There was 1 case of Bright's disease treated in the hospital in the year 1917 against 1 in the year previous to it. The patient who had chronic Bright's disease died.

18. **Income and Expenditure.—**

* * * * * * *

19. Explanation of increase and decrease.

Receipts.

(*a*) The increase of Rs. 11,168-8 in the receipts from the residents and patients admitted into the first class is due to the admission of more people in that class in the year 1917 as compared with 1916.

(*b*) The increase of Rs. 266-7-6 in the Nurses' fees in 1917 is due to the more employment of nurses in the outside cases and also in special cases in the hospital attached to the Sanitarium as compared with the year 1916.

(*c*) The increase of Rs. 708-11-9 against fees for medical attendance is due to the treatment of more patients in the Sanitarium and Hospital in the year 1917 as compared with the year 1916.

(*d*) The small increase against the head "Breakages" calls for no remarks.

(*e*) The increase of Rs. 60 against the head "X Ray" is due to the fact that in 1916 the "X Ray" apparatus was not in working order. The increase of Rs. 60 in the year 1917 against this head is due to the sale of a Switch-board which was not required to Dr. J. C. Bose.

(*f*) In the year 1916 a new billiard table cloth was purchased, and for this reason there was no credit balance against the head "Billiards." In the year 1917 there was a surplus of Rs. 26-1 against this head after meeting all expenditures, such as the pay of billiard marker, etc.

(*g*) The "Interest on Investments" and the "Interest" accrued on credit balance in the banks were shown separately in the accounts this year. So there has been an increase by Rs. 31-10 against "Interest" and decrease by Rs. 36-11-8 against "Interest on Investments."

(*h*) The decrease in the receipts against the head "Intermediate class" by Rs. 1,825-10 was due to the fact that the Intermediate class rooms were mostly occupied throughout the year by the first class residents who had their meals in the first class table.

(*i*) The decrease of receipts from the second and third class residents was due to the admission of less number of people and also their staying in this institution for less number of days in 1917 as compared with the year 1916. Owing to the war the cost of living in the hills became very much expensive and the issue of week-end and return tickets by the Railway Companies was prohibited, and this might have prevented many people, who generally ask for accommodation in these classes, from visiting this hill station.

(*j*) The fall in the receipts for "Operation fees" in 1917 was due to the less number of operations performed in that year as compared with the year 1916.

(*k*) In the year 1917 less number of persons were treated in the hospital free beds, hence there has been a fall in the receipts by Rs. 334-8 as compared with the year 1916.

(*l*) The fluctuations against other heads of receipts were trifling and call for no remarks.

Expenditure.

(*a*) The increase in the allowance drawn by the Civil Surgeon in 1917 is due to the payment to him of "Confinement fees" realised from the first class patients as honorarium. This amount is now debited against "Civil Surgeon's allowance" according to the instructions of the auditors. In the year 1916 a part of this amount was debited against the head "Medical attendance" before the receipt of such instructions.

(*b*) The increase of expenditure against "Nurses' salaries" and travelling allowance is due to the employment of a few outside nurses to help in serious cases and confinements.

(*c*) The increase of expenditure by Rs. 5,118-8-6 against "Diet" in 1917 is due to the admission of more first class residents in the Sanitarium as compared with the year 1916. It is also due to the decision of the Committee, dated the 12th June 1917, to spend a little more on diet owing to certain complaints which were received regarding the quality and quantity of food supplied.

(*d*) The increase of expenditure against the head "Fuel" in 1917 by Rs. 221-11-3 is due partly to the admissions of more first class residents. It is also due to the increase of price of coal and firewood as compared with the year 1916 owing to the war.

(*e*) Against the head "General Charges" the expenditure incurred for the railway freight on goods, purchase of postage and receipt stamps, the costs for the repairs to the utensils and other petty items of expenditure are shown. The increase of expenditure against this head is trifling and calls for no remarks.

(*f*) The increase of expenditure against "Stationery and Printing" is due to the price of these articles having gone up on account of the war.

(*g*) The small increase of expenditure for "Advertisements" in 1917 is due to the increase of rate of advertisements as compared with the year 1916.

(*h*) The increase of expenditure by Rs. 456-9 against the head "Repair and Construction" is partly due to the price of materials having gone up on account of the war and also to the payment of Rs. 352-6 to Messrs. Baghman & Co., for carrying out certain repairs to the electric light wires in the Sanitarium and Hospital and supplying bulbs for the rooms.

(*i*) The amount against "Rates and Taxes" will vary each year as the charge for excess water supplied by the Municipality is debited in this head of accounts.

(*j*) The increase of expenditure against the head "Establishment" in 1917 is due to the payment of travelling allowance to Captain Harding, Resident Medical Officer, from Madras to Darjeeling, and also to the entertainment of a few extra servants when the house was full during the season.

(*k*) The increase of Rs. 583-5-2 against "Insurance" is due to the adjustment of past years' balance within the year 1917.

(*l*) The increase of expenditure against the head "Servants' Clothing" in the year 1917 is due to the price of the materials having gone up on account of the war. It is also due to the changing of some uniforms for servants which had turned out old.

(*m*) In the year 1917 medicines were purchased locally according to the requirements, and as there were certain medicines in stock the expenditure was less by Rs. 770-0-6 as compared with the year 1916.

(*n*) The decrease of expenditure in 1917 against the head "Lighting" is due to the revision of the rule 28(*a*) in May 1917. The Committee resolved that the charge for lighting will be annas 4 for first and intermediate and annas 2½ per diem for second class *adult* inmates. Formerly the charge for lighting for the first and intermediate class *rooms* was annas 4 each and for the second class *room* annas 2½ per diem.

(*o*) The fluctuations against other heads of expenditure are trifling and call for no remarks.

20. **General Remarks.**—The daily average cost of diet for residents including the staff was Re. 1-11-9 as compared with Re. 1-7-5 in the year 1916. The cause of increase has been fully explained in item (*c*), expenditure on "Diet."

21. The debit of the amount of Rs. 2,346-10-9 in the Revenue account, on account of depreciation on Furniture and Library, has reduced the profit for the working of the year 1917 to Rs. 3,624-4-1. The depreciation is not really expenditure and is not taken into account in the Government accounts So if this amount is excluded from the above statement the real profit on the working of the institution during the year 1917, excluding the balance for the year previous to it, will amount to Rs. 5,970-14-10.

22. Beyond the ordinary repairs to the buildings carried on by the Public Works Department no other improvements of any importance were carried out in the year 1917.

23. The Sanitarium was officially visited by His Excellency the Governor of Bengal and the following House-Visitors in the year 1917:—

(1) Rev. Canon R. Stuart.
(2) Rev. H. C. Duncan, M.A.
(3) Rev. Father C. Grant.
(4) E. A. Wernicke, Esq.
(5) C. E. Briscoe, Esq.

24. Sister Mary Frances, C.S., J.B., was in charge of the nurses and linen room and the Library attached to the Sanitarium.

25. The Committee accepted the resignation of Captain Harding in July 1917 on account of his ill health, and Mr. J. C. Chalke was appointed Resident Medical Officer till the Sanitarium was closed.

26. Miss L. Cox acted as House-Keeper and Babu Sidheswar Dey as Accountant of this institution throughout the year 1917.

The staff of this institution worked entirely to my satisfaction.

27. The Committee held seven meetings against eight in the year 1916. The most important subject dealt with was alterations to certain rules.

No. 1790.—The following extracts are published for information :—

His Majesty the KING has been graciously pleased to approve of the following Awards to the undermentioned Officers and Warrant Officers, in recognition of their gallantry and devotion to duty in the Field :—

* * * * * *

AWARDED THE MILITARY CROSS.

* * * * * *

Subadar Major Bhim Sing Thapa, I. O. M., Gurkha Rif.

For conspicuous gallantry and devotion to duty. He led his platoon in an attack through intense machine-gun and rifle fire. After the capture of the enemy's position, seeing that a gap had occurred between the right of the battalion and the next unit, he filled the gap on his own initiative He took command of that portion of the line, the British officer having been killed, and consolidated the position under very heavy shell and machine gun fire. He set a magnificent example of courage and determination.

* * * * * *

Subadar Damar Sing Gurung, Gurkha Rif.

For conspicuous gallantry and devotion to duty. He led an attack on an enemy patrol. Having outstripped his men in the charge, he saw one of the enemy about to throw a bomb. He at once rushed at him and wrested the bomb from his hand. During a counter-attack by a strong force of the enemy, he volunteered to go forward to an advanced portion of the line, which was endangered by the enemy's attack. He crossed a hundred yards of exposed ground under heavy rifle fire, and took command of that part of the line until the attack was finally repulsed. He set a magnificent example of courage and determination.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT, I OF 1893.

NOTIFICATION.

No. 1927M.—The 12th August 1918.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

No. 853M., dated Chinsura, the 11th July 1918.

Memo. by—D. H. LEES, ESQ., I.C.S., Commissioner, Burdwan Division.

COPY, with copies of enclosures, submitted to the Secretary to the Government of Bengal, Municipal Department. Municipal Branch.

No. 975-G., dated Howrah, the 18th June 1918.

Memo. by—The Magistrate of Howrah.

COPY, with copies of enclosures, forwarded to the Commissioner of the Burdwan Division, for information.

No. 928G., dated Howrah, the 12th June 1918.

From—THE HON'BLE BABU MAHENDRA NATH RAY, M.A., B.L., C.I.E., Chairman of the Howrah Municipality,
To—The Magistrate of Howrah.

I have the honour to submit herewith two statements showing the warehouses licensed under the Fire Brigade Act, I of 1893, and receipts and disbursements on account of the same for the year 1917-18.

The collection of fees works out to be 98 per cent. of the current demand and 53 per cent. of the arrear demand, as against 82 per cent. of the current demand and 26 per cent. of the arrear demand reported last year. In consequence of the revision of assessment the amount of demand has also increased from Rs. 16,120 of the last year to Rs. 18,301 in the current year. This two-fold increase in the demand at the rate of collection has made any revision of the scale of fees levied under section 10 of the Act, as foreshadowed in this office letter No. 757-G., dated the 20th June 1917, unnecessary.

The scale of fees remained the same as that reported in this office letter No. 615-G., dated the 9th June 1916.

The direction contained in the first proviso to section 10 of the Act was followed.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 8th August 1918.

Summary.—Seasonable rain fell throughout the province, improving the prospects of standing crops to some extent and facilitating the transplanting of winter paddy, especially in Western Bengal. Harvesting of autumn paddy and jute is proceeding. The outturn is expected to be fair. Damage to the standing crop by excessive rainfall, floods and insects is reported from a few places. The prospects of winter paddy and sugarcane appear satisfactory. The average price of rice has risen by about 2·7 per cent., as compared with that of the previous week.

RULES.

1. Whenever it appears to the Magistrate of the district or the Sub-divisional Magistrate, within whose jurisdiction any ghât is situated at which steamers call, that by reason of the existence of an epidemic in the neighbourhood of such ghâts, there is danger of passengers suffering from the said epidemic being taken on board a vessel, he shall, *in consultation with the Civil Surgeon of the district*, depute a Medical Officer to inspect and pass all the passengers embarking at the ghât in question, and no passenger may embark without being so examined and passed.

2. (*1*) Whenever any case of plague, small-pox, cholera, or other dangerous epidemic disease occurs on board a river steamer, the Medical Officer of the steamer or, where there is no such Medical Officer, the Master or serang, shall immediately—

(*a*) remove the patient together with his bedding, drinking utensils and food to a part of the deck at the extreme stern of the steamer, where he shall be segregated from the rest of the passengers by a *purdah* or awning. In the case of plague, steps should be taken immediately to get rid of any fleas that may be present in the clothing, bedding, and, if considered necessary, in the baggage of the patient, by the complete immersion in boiling water of all articles capable of affording a lodgment for fleas ;

(*b*) cause all excreta, vomit and urine which may have been discharged on to the deck by the patient to be cleaned away with *a disinfectant taken from the list prescribed and maintained by the Sanitary Commissioner*, and

(*c*) report the case to the Sub-divisional or District Magistrate within whose jurisdiction the nearest ghât lies, and also to the Civil Surgeon of the district.

(*2*) Where such ghât is not at the headquarters of a subdivision or district, the report mentioned in sub-clause (*c*) of clause (*1*) shall be sent by the Medical Officer of the steamer, or Master or serang, as the case may be, by the most expeditious means available, to the next headquarters of a subdivision or district at which the steamer will touch.

(*3*) At any station within the Port of Calcutta the report shall be made to the Health Officer of the Port.

3. If, when the case occurs, the steamer is lying at a ghât at the headquarters of a subdivision or district, or, otherwise, when the steamer has reached the nearest ghât which is at such headquarters, the Master or serang shall not move the steamer therefrom until permission has been given by the District or Subdivisional Magistrate, or by the Medical Officer under rule 9.

4. (*1*) On receipt of the report mentioned in rule 2, the Magistrate or Civil Surgeon shall at once depute a Medical Officer to inspect and disinfect the steamer.

(*2*) Such Medical Officer shall visit the steamer, and if a suitable hospital is available, or if other satisfactory arrangements can be made for his treatment and segregation, shall bring the patient to land.

(*3*) Within the Port of Calcutta the Health Officer of the Port shall perform these duties.

5. Where no such hospital is available and no such arrangement can be made, the patient shall not be allowed to land, but the Medical Officer deputed under rule 4 shall take steps to ensure the proper segregation of the patient on the steamer and to satisfy himself that every possible precaution has been taken to prevent the spread of the disease.

6. The Medical Officer deputed under rule 4 shall in all cases cause the deck, cabins, latrines, and any other part of the steamer where the patient has been, to be thoroughly washed down with *a disinfectant taken from the list prescribed and maintained by the Sanitary Commissioner*, and all utensils which have been used by the patient, to be disinfected.

(2) If they have not already been disinfected as directed in rule 2 *(a)*, the clothes of the deceased (except those in his baggage), his bedding and all food in his possession shall be burnt, unless orders to the contrary are passed by the Medical Officer.

8. The Medical Officer deputed under rule 4 shall ascertain the names and addresses of all members of the party accompanying the patient, and shall report them through the Magistrate to the Magistrate of the district to which they are proceeding.

9. When the orders contained in these rules have been complied with, and the Medical Officer deputed under rule 4 is satisfied that there is no reason further to detain the steamer, he may give permission to the Master or serang to proceed on the journey.

10. The owner of every steamer shall be bound to keep on board each steamer one gallon of *a disinfectant taken from the list prescribed and maintained by the Sanitary Commissioner.*

11. The patient may be permitted to land on the expiry of a period to be fixed by the Medical Officer deputed under rule 4.

The normal surplus which may be expected in future, i.e., the difference between the average ordinary income and the average ordinary expenditure, calculated on the figures in columns 13 to 15 and 17 to 19, respectively. (20)	Remarks. (21)
Rs. 308.	

In addition to the details required on the reverse, clear information should be given below under the following heads:—

(*a*) If the ordinary surplus is insufficient to meet the charge of the proposed loan, the particular steps which the Municipality has taken, or has agreed to take, in order to make good the deficiency.

(*a*) In consequence of the enhancement of the percentage at which the water-rate was levied and the revision of the latrine-rate from 1st April 1918, the financial position of the Municipality has improved and is better than the figures shewn in column 20 of the loan application would indicate.

(*b*) The reserve of taxation or other possible means of increase in the revenue of the Municipality.

(*b*) The income has been increased from the beginning of this year by enhancing the percentage at which the water-rate was formerly levied and by revising the scale of latrine-fees, which will yield an increased income of about Rs. 6,000, the demand being about Rs. 6,400. The imposition of a tax on horses and other animals from 1st October 1918 will also add Rs. 200 per year to the income of the Municipality. The scheme when executed is expected to effect a saving of the present expenditure for sweepers by Rs. 1,000 a year.

(*c*) A statement of all outstanding loans specifying in respect of each loan, the date when taken, the purpose (very briefly), the amount, the annual charge involved, and the amount still payable.

(*c*)

(*d*) Any explanation in regard to receipts and expenditure to show the true financial position of the Municipality when such position is otherwise than the ordinary surplus would indicate.

(*d*) The ordinary surplus does not indicate the true state of the finances of the Municipality, *vide* remarks under (*a*). Moreover, expenditure of Rs. 7,903 incurred during 1915-16 and 1916-17 from the balance of the accumulated funds for the execution of the Surface Drainage Scheme of this Municipality brought forward to 1915-16, does not form part of the ordinary income of those years.

No. 899T.R.—The 14th August 1918.—The report on the working of the Government Cinchona Plantations and Factory in Bengal for the year 1917-18 is published for general information.

L. BIRLEY,
Secy. to the Govt. of Bengal.

FIFTY-SIXTH ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATIONS AND FACTORY IN BENGAL FOR THE YEAR 1917-18.

1. General.—The improvement in quinine production and the financial working of the department having been reviewed in previous reports (1914—1916), another aspect of the work of the department is now presented, so far as it can within the limits prescribed.

Cinchona has so far been cultivated only on forest soil. A plantation starts by destroying forest and continues its destruction so long as the plantation extends. The cost of the destruction is a financial charge against Cinchona, but so far the value of the forest has been ignored. The alternatives are, either to debit the value of the forest against Cinchona, or for the Cinchona Department at its own expense to re-afforest as opportunity allows. The second is much the better. The first alternative allows the department to leave an area finally cleared of Cinchona to become the prey of useless jungle plants. The second ensures replacement of the original forest by one at least as valuable and serves to recuperate the soil and fit it again for Cinchona after a lapse of years. Neglect of re-afforestation, except for trivial acreages planted with fuel trees for factory use, combined with other factors, had reduced Mungpoo Plantation, after forty years of existence, in the main to a lamentable condition. Pre-occupation with the extension of the factory (1905—1907) delayed dealing with the condition until 1907-08, when re-afforestation was started. Since that year, from 150 to over 360 acres have been re-afforested annually, the total acreage now being 2,838 on Mungpoo with nearly 2,600,000 trees and the total cost Rs. 2,37,503. The blocks have been planted with a mixture of timber and fuel trees of mixed species of each class, the classes and species being mixed, partly that the quick-growing fuel trees might act as "nurses" to the slower growing timber trees, the fuel trees being cut out for factory use when their removal would be for the benefit of the timber trees, partly to lessen the risks of the general injury to blocks by pests or blights, partly to recuperate more effectively the soil than solid planting of single species would be likely to do. For the first few years a block requires cultivation, thereafter only ordinary sylvicultural attention. The result of ten years' work has been satisfactory. The older blocks have a beautifully even appearance, and the whole is now one of the finest pieces of afforestation in India. As an indication of the growth it may be stated that the average height of 9-year old Birch and Alder trees is nearly 70 feet with a girth of 2 feet. Lest it be thought that the officer responsible for initiating the scheme is not the best qualified to express an opinion on its success, it may be mentioned that the most practical, and a highly appreciated, testimony to the work comes from the Forest Department. It has now become practically an annual custom for the Conservator of Forests, and as many of his Deputies as can arrange, to spend a few days in seeing the work, and for the local Forest officers to bring their subordinates and the instructor of the Kurseong Forest School to bring his pupils for instruction. The carrying out of the scheme has been entrusted from its beginning to Mr. P. T. Russell, now manager of Mungpoo Plantation, and he deserves the greatest credit for the admirable work he has done.

Turning to Cinchona, both plantations are comparatively immature, for all the acreages (625) planted on Munsong up to 1909 have been cleared, and of the 2,060 existing 1,787 are less than six years old, while 338 of the 454 on Mungpoo are also less than six years. The change from relying largely on Java bark to a policy of large plantation extensions did not come in time to counteract entirely present conditions, in which Java bark cannot be purchased, and it will be two or three years yet before the present acreages will be old enough to supply enough bark to keep the factory working at full capacity. The cultural conditions of both plantations are satisfactory, but Munsong is finding great difficulty in obtaining sufficient labour. Owing to this and the present impossibility of increasing the staff in proportion to the increase of acreage Mr. Green, the manager, and his assistants are bearing a very heavy burden of work, which they are doing ungrudgingly and very well. For reasons mentioned, the factory has been working at an economic disadvantage, which will disappear as more plantation bark becomes available. As the Assistant Quinologist has been on military service since 1916, a heavy strain has fallen on Mr. Shaw in having to perform single-handed both ordinary factory and analytical work. The importance of his work and its competent performance need no emphasizing.

In the 1915-16 report it was stated that the deficit up to that date, due to large expenditure on bark purchase and extra extensions, made some years before to meet the evil days then seen to be approaching, would speedily be replaced by a surplus. This has now happened. The total expenditure of all sorts from 1900-01 to 1917-18 is nearly Rs. 47,00,000; the total revenue Rs. 77,73,700 and the surplus Rs. 30,73,700. In addition to this surplus, assets are 2,514 acres Cinchona at Rs. 5,78,057; 3,142 acres afforested at Rs. 2,41,703; factory products in stock Rs. 4,53,532; bark and oil Rs. 40,000, or a total of over 13 lakhs, all at cost price.

While the financial results may be claimed as satisfactory, still more so is the fact that the department has so far met the great demand for quinine. During the three years 1915—18 over 192,000 lbs. have been issued, a quantity exceeding the total issues for 22 years from 1887, when quinine was first made in the factory, to 1908. A great part of the extra demand has been for the armies, so that the department can claim, in so far as the supply of quinine has prevented the disablement of large numbers of men by malaria in fever-stricken regions, to have given valuable aid in the war.

2. **Extensions, acreages and crops.**—(*a*) *Mungpoo.*—Rainfall was 144·8 inches or .21 above the average. *Fifty-three* acres of *Cinchona Ledgeriana* were planted. About 57 acres, mostly of *C. Ledgeriana*, were cleared, yielding 196,216 lbs. bark. The average quinine percentage of the *Ledger* was 4·93, of the mixed barks 4·5. The acreage standing with a full complement of Cinchona is 454. Over 1,000 tons of firewood of value of over Rs. 2,000 were supplied to the factory.

(*b*) *Munsong.*—Rainfall was 117·31 inches or 20 in excess of the average. Two hundred and five acres *C. Ledgeriana*, 9 *C. officinalis*, 5 *C. succirubra*, and 43 *C.* (*Ledger* × *succirubra*), in all 262, were planted: 149½ acres were cleared, yielding 422,487 lbs. bark, of which 382,591 lbs. were of *C. Ledgeriana*. The average quinine percentage of the *Ledger* was 4·77, of the mixed barks 4·57. The existing acreage with full complement of Cinchona is 2,060. 184 acres were re-afforested bringing the total up to 304 acres.

(*c*) *Plantations as a whole.*—The total area under Cinchona is 2,514 acres. The approximate number of Cinchona trees is 3,436,000, being about 2,758,000 on Munsong and 678,000 on Mungpoo. It has to be noted that last year's report credited the plantations with nearly 2 million more Cinchona trees than existed. The total bark harvest was 618,703 lbs.

3. **Factory Work.**—224,027 lbs. of bark from Mungpoo and 430,066 from Munsong, with average quinine percentages of, respectively, 4·5 and 4·54, were used, or a total of 654,093 lbs., with a theoretical content of 29,622·6 lbs. quinine sulphate. Actually 29,417·5 lbs. were manufactured, also 8,518 lbs. Cinchona febrifuge, 1,261 lbs. quinoidine, 930 lbs. residual alkaloids, and 50 lbs. Cinchonidine.

4. **Cost and value of bark.**—Hitherto the expenditure on afforestation has not been debited against the cost of Mungpoo bark, but for reasons explained in paragraph 1 it now is. Including this, the average annual expenditure per acre is Rs. 74·5. The average annual bark increment per acre is 330 lbs. Cost of Mungpoo bark is therefore 3·6 annas per lb. The corresponding factors for Munsong bark being Rs. 66 and 400 lbs., its cost is 2·64 annas per lb. 196,216 lbs. Mungpoo bark cost therefore Rs. 44,148·6, and 422,487 lbs. Munsong bark Rs. 69,710·35. The average unit-rate for 1917-18 was 11·5 Dutch cents, equal at present exchange practically to 2 annas. So the Mungpoo bark of average 4·5 per cent. quinine was worth Rs. 1,10,732·5, and the Munsong bark of average 4·57 quinine was worth Rs. 3,51,717·19. Both plantations therefore show good financial results.

5. **Cost and value of quinine.**—(*a*) **Cost in bark.**—The 224,027 lbs. of Mungpoo bark at 3·6 annas and the 430,066 lbs. of Munsong bark at 2·64 annas a pound together cost Rs 1,21,367·59. The cost per pound in the bark of the 29,417·5 lbs. quinine extracted was therefore Rs. 4·125. The higher cost compared with last year's is due, partly to cost of afforestation on Mungpoo being now debited against its bark, partly to the cost of Munsong bark being taken at too low a figure in last year's report.

(*b*) **Cost of extraction, etc., to delivery to railway.**—The factory expenditure *plus* share of general charges *plus* depreciation on buildings and machinery, *plus* cost and carriage of chemicals used in excess of quantities purchased during the year and *minus* cost and carriage of those remaining over was Rs. 1,06,944. Deducting Rs. 10,796, the cost of manufacturing products other than quinine, the cost of extracting, etc., the 29,417·5 lbs. produced was Rs. 96,148 or Rs. 3·268 per lb. The lesser cost of extraction compared with that of last year is due to more bark being used up, so that the factory worked more economically.

(*c*) **Total cost.**—This is Rs. 1,21,367·59 + Rs. 96,148 = Rs. 2,17,515·59, or Rs. 7·4 per lb. almost.

(*d*) **Value.**—The lowest wholesale rate at which quinine could be bought in 1917-18 was Rs. 26-8 per lb. At this rate the value of 29,417·5 lbs. is Rs. 7,79,563-12 or Rs. 5,62,048 more than it cost.

6. **Sales and selling rates.**—Issues of all products were 117,998 lbs. 7 oz., of which 98,145 lbs. 7 oz. were quinine. For details of other products see Appendix * C (1). Of the quinine, 16,306 lbs. 14 oz. were issued as "treatments" at Rs. 21-14 per lb., the remainder at Rs. 28 to Rs. 30 per lb. according to quantities taken. Rates for other products were Cinchona Febrifuge Rs. 5 to Rs. 6; Cinchonidine and Cinchonine Rs. 11 to Rs. 12; Quinoidine and residual alkaloids Rs. 4 per lb.

7. **Expenditure and receipts.**—Total expenditure Rs. 2,38,276-12-10. Gross receipts Rs. 27,72,916-7-9, of which Rs. 21,11,062-12 were credit and Rs. 6,60,853-11-9 cash. Of the latter Rs. 1,24,090-12-3 or ⅝ ths of the revenue from sale of "treatments" were credited to the Prison Department for preparation and distribution of "treatments". Net receipts of the Cinchona Department were therefore Rs. 26,48,825-11-7, showing a surplus of Rs. 24,10,548-14-8.

8. **Stock account and quinine reserve.**—The value of stock is taken at Rs. 18,22,396-7-7. The great demand has reduced the reserve from 165,000 lbs. at the end of 1915-16 to 63,248 lbs. 12 oz. at the end of 1917-18.

9. **Block account.**—This is essentially a statement of change in valuation of trees, buildings and machinery since the end of the previous year. The valuation for 1916-17 was vitiated by a confusion between "rate per unit" and "price per lb." for bark, whereby the unit rate was given as 20·6 instead of the correct 12·37 cents. This excess of over 8 cents or 1⅜ annas a unit, multiplied by the millions of pounds of bark on the trees containing 2 to over 5 units of quinine per pound raised the valuation of bark on trees and in stock to an inordinate degree about Rs. 18 lakhs above the correct market valuation. This excess has now to be cut off, with the result that despite the natural increase in value from bark increment and extensions during 1917-18, the block account shows a heavy "loss" of over 14 lakhs. Even the valuation now shown in Appendix * F is an inflated one, based as it is on present abnormal market rates for bark. No sane person would offer 14 lakhs for the Cinchona trees on Mungpoo and Munsong unless he were certain that the present market rates would endure for the next few years at least. While valuation of bark on trees and of bark and quinine in stock at current market rates is reasonably safe so long as the market is not subject to great fluctuations, it is not safe when rates are abnormally high as at present. In these circumstances a safer valuation for both stock and block is the cost price mentioned in paragraph 1.

10. **Profit and Loss.**—This would not be so called by a private company. It is really a statement of change in market valuation of block and stock—sales also included—since the end of the previous year. The error that vitiated the 1916-17 block account also vitiated that year's profit and loss valuation, to the extent of showing an increase in valuation or "profit" of about 20 lakhs of rupees in excess of the true market valuation. This has now to be corrected by showing a "loss" of nearly 7 lakhs for 1917-18, despite the fact that the actual surplus was over 24 lakhs. The true state of the department is given in paragraphs 1 and 7.

* Not printed.

11. **Land rent.**—Rupees 4,883-9-6 were paid into Darjeeling Treasury, no credit being taken for it by the department.

12. **Staff.**—Mr. H. G. Carter, M.B., officiated as Superintendent up to the 7th January 1918. Thereafter Lieutenant-Colonel Gage, I.M.S., resumed charge. There were no other considerable changes in staff.

ADDENDUM.

Cultivation of Medicinal plants other than Cinchona.

Ipecacuanha.—This species has been in existence on Mungpoo for many years, but until recently there was no encouragement to extend its cultivation. The experience of the last few years, however, having shown the undesirability of relying entirely on external sources for supply of emetine, renewed attention has been given to its cultivation. It is a troublesome species to cultivate in the latitude of Mungpoo, and much time and care have to be expended on it. The stock at Mungpoo has recovered to a great extent from the set-back experienced in the winter of 1916, and there are now about 55,000 plants in stock.

Digitalis purpurea.—Over 100 lbs. of dried leaf is now available at Mungpoo. About 30,000 plants have been put out to provide leaf in the spring of 1919.

Chenopodium ambrosioides and *C. anthelminticum.*—Large extensions of these species are being put out on Mungpoo to provide seed for extraction of the oil used in the treatment of Hookworm disease.

Belladonna.—Arrangements are being made for the cultivation of this species on a considerable scale at Mungpoo.

A. T. GAGE, LIEUT.-COL., I.M.S.,

Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal.

RESOLUTION ON THE ANNUAL REPORTS OF THE VETERINARY COLLEGE AND OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1917-18.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture Branch.

RAMNA (DACCA), THE 17TH AUGUST 1918.

RESOLUTION—No. 915T.—R.

READ—

The Annual Reports of the Veterinary College and of the Civil Veterinary Department, Bengal, for the year 1917-18.

Lt.-Col. A. Smith, Principal, Bengal Veterinary College, continued throughout the year to hold charge of the College as well as of the office of Superintendent, Civil Veterinary Department, Mr. P. J. Kerr and Mr. A. W. MacGregor, being still absent on military duty. As in the previous year all touring and inspection work of the Department was performed by Babu Sarat Chandra Pal, Deputy Superintendent, who was on tour for 94 days. Eight Veterinary Assistants of the Department were on military duty. Mr. R. V. Pillai, Laboratory Assistant of the College, was temporarily deputed to military duty during the year to bring mules from China to India. It is reported that his work was most satisfactory.

2. There was an increase in the number of students at the Bengal Veterinary College during the year, the number on the roll at the end of the session being 157 as compared with 96, 135 and 148 in the previous three years. Only one-third of the students are Bengalis; Upper India, Assam, Madras, Ceylon and Burma are represented among the other students. Thirty-one students, of whom 11 only belonged to Bengal, graduated from the College at the close of the session. All the new graduates have been employed as Veterinary Assistants; but the demand for qualified Veterinary Assistants in this Presidency still exceeds the supply.

3. The report of the Civil Veterinary Department shows a marked increase in the mortality of animals from contagious diseases during the year, the total number of deaths reported being 26,486 as against 8,415 in the previous year. The increase is due to abnormally severe outbreaks of rinderpest in several districts of the Presidency, this disease being responsible for 21,126 deaths compared with 5,443 in the previous year. The mortality was heaviest in the districts of the 24-Parganas, Noakhali, Rangpur and Bakarganj. The Superintendent remarks that reports were generally received late and that the majority of deaths took place before the Veterinary Assistants arrived at the affected localities. The staff of the Department dealt with 365 outbreaks of rinderpest and inoculated 53,124 animals against 161 outbreaks and 20,498 animals in the preceding year. The Governor in Council desires to impress upon the touring officers of the various departments who are required under existing orders to report outbreaks of cattle-diseases, the urgent need of sending a report promptly both to the Veterinary Assistant and to the Chairman of the District or Local Board as soon as they hear of an outbreak.

There were also virulent outbreaks of rinderpest during the year all over Calcutta and its suburbs, the number being 113 as against 57 in the preceding year. Prompt steps were taken on each occasion to prevent the spread of the disease and inoculation was performed in 5,518 cases.

4. During the year the Itinerant Veterinary Assistants visited 11,520 villages and treated 67,333 animals as compared with 10,047 villages and 57,462 animals in the previous year.

5. In Calcutta and its suburbs all stables were regularly inspected. Glanders was detected in two and Surra in three stables. In the mufassal 27 deaths from glanders were reported as against 67 in the previous year.

6. Two new dispensaries were opened in the district of Bakarganj during the year, bringing the total number of such institutions up to 27. The number of patients treated during the year was 34,889 as against 37,785 in the previous year. The decrease is attributed to the fall in the number of cases of foot-and-mouth disease. The Governor in Council notices with satisfaction that arrangements are being made by certain District Boards to construct veterinary dispensaries.

7. The number of stud bulls kept by Government and local bodies decreased from 71 in the previous year to 68. The Governor in Council notices with pleasure the gift by Babu Dukhaja Mohan Chaudhuri of a good Montgomery bull to the veterinary dispensary in Rangpur district.

8. The work of the Deputy Superintendent, Civil Veterinary Department, Inspectors and of the staff of the Bengal Veterinary College was satisfactory. His Excellency in Council records his appreciation of the services of Lt.-Col. Smith, whose duties are arduous owing to the shortage in the teaching staff and the absence on military duty of officers of the Department.

By order of the Governor in Council,

L. BIRLEY,

Secy. to the Govt. of Bengal.

DURING the year under report the Commissioners held twelve ordinary meetings.

2. The number of observations of smoke emission taken and the number of factories visited for the purpose of inspection of power plant, instruction of firemen and testing of fuel appliances were 10,044 and 5,375, against 10,399 and 4,936 in the preceding year.

3. The number of complaints received from the public was 53 against 42 during the previous year, and the number of reports made to owners of factories, steamships, locomotives, etc., for departmental action was 1,200.

4. The average of the observed emission of objectionable smoke in terms of scale 6 was 1·29 minutes in the hour, against the average of 1·31 in the previous year. The progress in this direction, as compared above, may appear to be trifling; but in reality the results are the best on record since the commencement of the work of the Commission in April 1906. The conditions arising from the war, the control of the quality and quantity of fuel available, the shortage of supplies and the necessity for interfering as little as possible with factories engaged on war requirements have demanded great discretion and tact on the part of the Commission in dealing with the question of excessive emission of smoke.

5. Statutory warnings served and prosecutions undertaken were 60 and 36, against 52 and 29 during the preceding year. The increase is small, and it is hoped that, with the growth of public interest in a matter of this importance, a gradual decrease in these figures will follow.

6. One of the most gratifying features of the year's operation is the large increase in the number who passed the voluntary examination of skilled stokers, viz., 33 against 2 in the previous year. By the employment of qualified stokers, not only is the work of the Commission lightened, but a considerable saving in the consumption of coal is effected, while at the same time the health of the public is ensured. The majority of the candidates for examination came from factories controlled by Indian owners; and the Governor in Council is hopeful that, when the great advantage to be derived from the employment of trained men is more widely appreciated, there will be a steadily increasing demand for their service. It is, therefore, desirable that owners of factories should, where and when convenient, send their stokers to be trained by the Commission's staff.

7. Plans for 34 furnaces were approved, altered and examined; of these 21 installations have been actually working with good results in the saving of fuel and in corresponding reduction of smoke emission and an increase in out-turn. As this is the first complete year in which the Commission have been able to exercise control in this direction, the result is very satisfactory.

8. In spite of war conditions and the difficulty in obtaining material, the use of gas and electricity for the purposes of generating heat and power has steadily increased.

9. The advance in every direction has been encouraging. The thanks of the Governor in Council are due to the public for their support and help and to the members of the Commission for their untiring endeavour in the cause of smoke prevention and in the efficient administration of the Act and the rules issued thereunder.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Government of India, Department of Commerce and Industry, the President of the Smoke Nuisances Commission, the Commissioners of the Presidency and Burdwan Divisions, the Commissioner of Police, Calcutta, the Chairman, Calcutta Corporation, the Vice-Chairman, Port Commissioners, Calcutta, the Secretary, Bengal Chamber of Commerce, Master, Calcutta Trades Association, the Honorary Secretary to the Bengal National Chamber of Commerce, the Chairman of the City Improvement Trust, Calcutta, and the Municipal Department of this Government.

Ordered, also. that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

V.—**Damage to standing crops.**—Excessive rainfall and high floods damaged standing crops in many places. The districts which suffered most from these causes are Dinajpur, Jalpaiguri, Dacca, Mymensingh and Tippera and also the state of Cooch Behar. Slight damage to the jute crop by insects was reported from parts of Nadia, Jessore and Midnapore.

VI.—**Condition of agricultural stock.**—The condition of agricultural stock was reported as fair. Cattle-disease was found to be prevalent in parts of the following districts :—Jessore, Burdwan, Birbhum, Bankura, Jalpaiguri, Darjeeling, Malda and the Chittagong Hill Tracts.

(5) Letter No. 1701, dated 3rd August 1918, from the Secretary, Bengal Chamber of Commerce.

THE question of the navigation of vessels by night in the lower reaches of the river Hooghly has been under the consideration of the Government

of Bengal during recent years. Up to 1913, the position was that at certain places between Mud Point and the boundaries of the Port of Calcutta, vessels were not allowed to be under weigh after dark and before daylight under any circumstances. On the other hand, between Saugor and the Sandheads inward and outward vessels were permitted to proceed freely by night as well as by day. As regards the intervening channel between Mud Point and Saugor, night navigation was not permitted under any circumstances. In 1913, the Commissioners for the Port of Calcutta, with the support of the Calcutta Liners' Conference and the Bengal Chamber of Commerce, submitted proposals for lighting the channel in the Hooghly between Mud Point and Saugor with a view to navigation by night. The Pilot Service, however, as a body were opposed to the scheme, not because they objected to night navigation in itself, but because they distrusted the adequacy of the lighting which the Port Commissioners proposed to provide The Port Commissioners thereupon installed a system of lights and this was examined by a Committee of practical navigators. In accordance with the recommendations of this Committee, additional lights were provided and other improvements which were thought desirable were carried out. Thereupon, in Resolution No. 618 of the Bengal Government, Marine Department, of the 16th February 1915, the Governor in Council was pleased to withdraw the restriction which had previously existed to night navigation on the stretch between Mud Point and Saugor. It was stated, however, that owing to the war night navigation would only be allowed in the case of ships going down the river ; that it must be understood that night navigation was not compulsory ; and that in unfavourable conditions, whether by night or by day, it must be left to the discretion of the pilot to decide whether he should proceed with the vessel in his charge. The pilots were also instructed that they should not move or keep their vessels under weigh above Saugor roads after dark and before daybreak without a written request to do so from the Master of the vessel.

2. The scheme came into operation from the 15th March 1915, but it was not till September of that year that any considerable use of the lighted channel was made. The officers of the Pilot Service had recommended the establishment of an attended light vessel at the time when night navigation was instituted; and after further experience a further recommendation was made that a lighted semaphore should be provided at Gabtola. These suggestions received the support of the Governor in Council in September and November 1916.

3. The Commissioners for the Port of Calcutta thereupon erected an electric lighted semaphore, the invention of Mr. H. G. Reaks, Officiating River Surveyor, at Phuldobi. This instrument was erected in November 1916, and has been working efficiently since the 1st December 1916. They also agreed provisionally to place in the Gabtola channel an attended light vessel, subject to reconsideration of the necessity for this attended light vessel after twelve months' experience. A suitable vessel the "Comet" was available, and she was placed by the Commissioners in December 1916 at a station in the Gabtola channel. There was, however, no opportunity to judge of the usefulness of the vessel as all the lights in the Port approaches remained extinguished under the orders of the Military authorities for a year from January 1917. After the Port approaches were relit, the Commissioner for the Port again placed the attended light vessel in the same position. Although full twelve months have not elapsed since its installation there appear to be good grounds for retaining this light vessel, as it is in a central position at the junction of the Jellingham and Gabtola channels ; and it is the one light which always remains visible unless it is out of position.

4. In view of the admitted necessity, owing to the war, of expediting movement of vessels in every way possible, the Port Commissioners have raised the question of the desirability of the utilization of the lighted channel for inward-bound vessels ; that is to say for the abolition of the remaining

restriction imposed by the orders of 1915. They have pointed out that there could not be any anticipated risk of collision between vessels meeting in the channel. They were confirmed in this view by the fact that the channel from Saugor to the outer light ships, where both inward and outward vessels proceed freely by night and by day, is at one place only 3,500 feet between 14 feet contours for a distance of 3 miles and the only guidance is derived from a single line of lighted vessels and buoys, while between Saugor and Mud Point the distance varies in width from about 3,300 to 8,000 feet and the channel is defined on both sides by lighted buoys. In this proposal, the Port Commissioners have received the support of the Port Officer and of the Calcutta Liners' Conference. The Officers of the Pilot Service were then consulted, and they brought to the notice of Government that there was no regular system of patrol for verification of the position of lights and buoys; that the lighted channel could only be used with advantage by inward-bound vessels during the neap tides; and that, should the advantage to be gained justify the risk, it should be undertaken only in fine weather and under favourable circumstances, and that at all times it should be left, without question, to the discretion of the Pilot to proceed with the vessel in his charge.

5. Enquiries were therefore made on these points. On the one hand the comparison as to the channels above and below Saugor does not take into consideration the set of the tides and the course of the two channels. On the other hand it has been ascertained that during the period of 1,095 days since the scheme was initiated, there have been only 31 occasions on which a light has been extinguished or the gas buoy adrift. As regards the want of a daily system of patrol, the Commissioners for the Port have informed Government that one of their larger survey boats is working in the lower reaches for roughly two-thirds of each month, and that the despatch vessel "Retriever" makes several trips in each month to the Sandheads, while early information of any mishap can be furnished by the officers of the Pilot Service or Masters of vessels navigating the river. There has been no accident from unlit buoys, and the Commissioners for the Port say that they are satisfied that there has been no reasonable risk of any mishap to shipping arising from this source. In regard to the navigation of inward vessels on neap tides, the Port Commissioners observe that the gain in time would be 24 hours as against a gain of 12 hours in the case of outward-bound vessels; and they urge that in times like the present when a delay of a few hours in arriving at a port rendezvous may have far-reaching consequences, such an advantage is of material importance and one which is well worth the risk,—in their view an inconsiderable one.

6. After having given very careful consideration to the recommendations of the public bodies, to the point of view of the Pilot Service and after consulting his expert advisors, His Excellency in Council is of opinion that, while it is impossible to make provision for all possible contingencies, every reasonable precaution and facility for night navigation appear to have been well considered and carried out, and that a reasonable margin of safety has been obtained thereby, which should cover all ordinary risks. Moreover, the long training and experience of the pilots give him confidence that their skill will diminish the risks which the proposal will involve. In these circumstances he directs that the restriction on night navigation of the portion between Mud Point and Saugor, which was partially removed for outward-bound ships in February 1915, and which was re-imposed for military reasons during the year from February to December 1917, may now be entirely removed for inward-bound as well as outward-bound ships. The safeguards laid down in the Resolution of the 16th February 1915 nevertheless still hold good; that is to say, it must be understood that night navigation is not compulsory; and that in unfavourable conditions, whether by night or by day, whether inward-bound or outward-bound, it must be left to the discretion of the pilot whether he should proceed or not with the vessel in his charge; and he will only do so

after receiving a *written request from the Master of the vessel in the* prescribed form.

Ordered that this Resolution be published in the *Calcutta Gazette* and that a copy of it be forwarded to the Port Officer, Calcutta, for information and communication to the members of the Pilot Service ; the Vice-Chairman of the Commissioners for the Port of Calcutta, for the information of the Commissioners ; to the Secretary, Liners' Conference, and to the Secretary, Bengal Chamber of Commerce, for information and for communication to those concerned.

The figures below represent the number of seamen of various nationalities shipped and discharged at the Consulates, details of which are shewn in Appendix II.

These figures are not included in Appendix 1.

The number of seamen on European Articles who deserted their vessels and failed to join was 44 and the number on Indian Articles 519. The majority were replaced by substitutes.

Repatriation of distressed seamen.—The total number of seamen repatriated during the year was 55, of whom 29 were repatriated owing to illness, 7 on termination of agreement, 4 on account of imprisonment, 2 on account of injury, 7 by mutual consent, 1 on account of insanity and 5 on account of venerial.

Relief to seamen.—The Work-house afforded relief to 3 seamen at a cost of Rs. 26, of these one was taken charge of by the Russian Consul, one sent to Lunatic Asylum and one absconded; 35 destitute seamen were admitted into the Sailors' Home during the year and a loss of Rs. 299 was sustained owing to seamen being unable to pay their board. Eighteen seamen were relieved in the Alms House by the District Charitable Society at a cost of Rs. 1,803-8.

Rupees 3,417 was paid to the crews of enemy vessels on account of balance of wages during the year.

Compensation to seamen of sunken vessels.—Rupees 28,440 was paid by the Government of Bengal for loss of effects to the surviving members of the crews of vessels sunk by enemy action and Rs. 53,406 by the Indian Relief Fund through this office, as further compensation to these crews.

Relief granted to the dependants of interned seamen.—The amount of relief given to the dependants of seamen interned in Germany by the Indian Relief Fund through this office amounted to Rs. 3,859.

Administration of Trust Funds.—Appendix III shows the transactions during the year of funds held in trust under different heads.

The balance of accumulated funds at the commencement of the year was Rs. 26,596 and the receipts during the year Rs. 96,618.

The payment from the funds amounted to Rs. 67,194 and Rs. 3,996 lapsed to Government, leaving a balance of Rs. 52,024 in deposit at the close of the year.

Transactions with Board of Trade.—Rupees 38,250 represents the transaction with the Board of Trade, of which Rs. 3,417 was paid on account of enemy vessels.

European seamen's money-orders.—A sum of £ 56 was remitted by seamen to their relatives in England as compared with £ 311 of the previous year

Financial results.—The figures below give the financial result of the office for the last five years:—

Year	Receipts	Disbursements	Savings
	Rs.	Rs.	Rs.
1913-14	1,23,047	69,875	53,172
1914-15	1,04,854	61,509	43,345
1915-16	94,319	57,669	36,650
1916-17	94,074	69,238	24,736
1917-18	76,929	58,855	18,074

A comparison in the savings of the present and the previous year shows a decrease of Rs. 6,662 due to a smaller number of vessels having visited the port on account of the war.

In conclusion, a brief reference to the great increase of work may be shown by the fact that the crews of 80 vessels sunk through hostile action have been dealt with. A more detailed report on this subject will be submitted separately, I would, however, take this opportunity of reporting the very good work done in the Shipping Office. The efficiency is due in a great measure to the zeal and capability of Mr. Reaks, Deputy Shipping Master, and those working under him.

Expenditure.—Appendix IV details particulars of the receipts and expenditure during the year.

Administrative changes.—The following changes have taken place in this office during the year:—

Mr. C. S. Cameron has been acting in place of Mr. C. H. Sharp who is still on leave. The shipping and discharging work of the Branch Shipping Office has been carried on by Mr. S. H. Reaks, Deputy Shipping Master.

Rules.

1. (*1*) Tree-tapping licenses may be issued by the Collector on the application—

(*a*) of persons licensed to sell *tari* by retail;

(*b*) of tappers on their own application, provided that such application is accompanied by an application for a pass for the transport of the *tari* drawn to some particular shop and that the latter application is countersigned or acknowledged to be correct by the shop-keeper to whose shop the *tari* is to be taken;

(*c*) of tree-owners (for not more than five trees in any period of twelve months ending the 30th September) for the drawing of *tari* required for domestic consumption but not for sale.

(*2*) Such licenses may be issued—

(*i*) in cases (*a*) and (*c*), in the name of the applicant himself or of his nominee;

(*ii*) in case (*b*), in the name of the applicant only.

2. Any person wishing to apply for a tree-tapping license must pay in advance the fees, or the first instalment thereof, as the case may be, payable in respect of the trees which he desires to tap, into the District Treasury or a Sub-Treasury.

3. Applications for the grant of such licenses must be made in the prescribed form to the Superintendent of Excise. Forms may be obtained free of charge from the District or Sub-Divisional Office or from the Inspectors or Sub-Inspectors of Excise. The *chalan* or money-order receipt for the payment of the fees, or the first instalment thereof, must be attached to the application. Applications may be either presented personally or sent by post.

4. Every person applying for the grant of a license under these rules shall be responsible to Government for all sums payable as fees in respect of the trees for the tapping of which the license is required.

5. On receipt of an application, the Superintendent of Excise shall at once, unless there is any special reason to the contrary, take steps for the marking of the trees by an officer superior in rank to excise petty officers and for the grant of the license. Applicants for such licenses shall point out to the marking officer, when required by the latter to do so, the trees in respect of which their applications are made. Should they fail to do so after reasonable notice, the fees paid by them shall be liable to be forfeited at the Collector's discretion.

6 The Collector may, from time to time, prescribe the minimum number of trees to be entered in an original application by a retail vendor. He may also direct that the trees situated in one mauza only shall be included in an application.

7. No *tari* shall be drawn from any tree, nor shall any pot be attached to any palm tree, until the tree has been marked as provided in rule 5.

8. Tree-tapping licenses shall be in force from the 1st October or any subsequent date to the 30th September immediately following.

9. A fee of Rs. 2 shall be payable on account of each palmyra or date tree for the tapping of which a license is applied for, and shall, unless the Excise Commissioner shall otherwise direct, be payable in the following instalments:—

Period within which the license is applied for.	Instalments in which the fee is to be paid.
Between 1st October and 30th April.	One-half at the time of application and the other half on the first of the second month following.
Between 1st May and 30th September.	The whole at the time of application.

10. Applications shall be received from 1st September, but the preparation of spathes shall not be permitted before 15th September, nor shall pots be attached to trees before the evening of the 30th September. In the case of date trees the process of preparation may be allowed from the 15th September, but the incision required for the insertion of the drip leaves shall not be allowed before the evening of the 30th September. In no case shall *tari* be drawn except during the currency of the license.

11. All *tari* drawn under tree-tapping licenses shall, as soon as the pots containing it are removed from the trees, be immediately conveyed direct under a transport pass, to be granted free of charge by the Superintendent of Excise, in the case of licenses granted on applications made under clause (*a*) or (*b*) of rule 1, to a licensed *tari* shop, or, in the case of licenses granted on applications made under clause (*c*) of that rule, to the house of the tree-owner. If a tapper desires to change the shop to which his *tari* is to be taken, the pass will be altered on application duly countersigned or acknowledged to be correct by the licensee of the new shop and on prepayment in cash of two annas in addition to the Court-fee stamp of one anna to be affixed to the application.

12. No *tari* drawn under these rules shall be sold except to a licensed retail vendor of *tari* or at a regularly licensed shop. Tree-foot sales or sales in the open are absolutely prohibited.

13. Unless the Excise Commissioner otherwise directs in any local area, no *tari* shall be drawn or kept, between sunset and sunrise, by a person holding a license granted under these rules in the garden or field in which the trees which he is licensed to tap stand, except the *tari* contained in the pots attached to the trees.

14. No person holding a license under these rules shall employ or permit to be employed as a tapper or carrier any person who has been convicted of a non-bailable offence or of an offence under the Excise or Opium laws, except with the written permission of the Collector.

15. The duties imposed by these rules on the Superintendent of Excise may, with the permission of the Collector, be delegated to an Inspector.
